#Professional Experience

Analysis Group | Learning & Development Technology Specialist

10/2011 - Current | Los Angeles, CA

- Co-led a firm-wide initiative to modernize training offerings with the firm's first learning management system.
- Thoroughly vetted leading systems, led focus groups, oversaw pilots, and successfully rolled-out to the entire firm.
- Create responsive HTML5 pages, develop the site's CSS styles, and set system logic for automatic user assignments.
- Develop custom JavaScript solutions for the Articulate Storyline course builder software.
- Team with firm-wide practice area experts to build engaging, self-paced online and blended courses.
- Actively curate content and build user profiles on the firm's intranet.
- Collaborated with key stakeholders and intranet team to modernize and improve the UI/UX of firm's intranet, resulting in significantly increased user engagement and satisfaction.
- Developed custom SharePoint task management workflow solutions for compliance teams, saving over \$15,000 in yearly vendor fees.
- Provide on-the-ground AV oversight and support for the yearly new hire orientation event in Boston.
- Transitioned to iOS & Android app for orientation attendees, resulting in over \$10,000 in vendor fees.
- Provide detailed translations of Japanese-language documents for case teams, including financial reports, medical research and healthcare surveys.
